Hi John, and thanks for sending this information. I appreciate the timeline of events leading up to where we are today. As I mentioned, Peter Gimlin of my staff will be talking with the regional PCB coordinators this week to make them aware of an upcoming meeting with my regional counterparts I'd like to have in late

February/early March, to gain a better understanding of how regions may have historically treated issues of this nature in the past. In preparation for Peter's discussion, he shared with them papers my division developed to explain HQ's consideration of this PCB fill material as an Excluded PCB Product if less than 50 ppm. I just want you to be aware that we will be discussing the Excluded PCB Product provision as well with the regions. Appreciate you keeping us informed.

Tanya

Good Day Jeff and Tanya,

Please find attached an updated briefing paper describing the decision-making process underlying Region 3's issuance of the NON to Hazelton Creek. This was prepared upon request to inform the conversation on the subject. I look forward to continuing the dialogue and if you folks need any additional information please do not hesitate at contacting me.
